Species 2

Introduction

Layout turns a tree of boxes, rows and paragraphs into pages. Text wraps at the width it is given, splits between lines at a page end and keeps at least two lines together. Layout turns a tree of boxes, rows and paragraphs into pages. Text wraps at the width it is given, splits between lines at a page end and keeps at least two lines together. Layout turns a tree of boxes, rows and paragraphs into pages. Text wraps at the width it is given, splits between lines at a page end and keeps at least two lines together.

> *An aside stands apart from the main text, like this sidebar.*

Plants

A leaf sits inside the line, and a note follows.

1. A footnote is marked as a note, not as a paragraph.

Lists

1. Look closely
2. Write it down

Species

Species	Height
Species 1	7 cm
