First fit

Without hyphenation

Typesetting a paragraph well means looking at all of it at once. A line that is set too loose or too tight is not an accident of one choice but the price of the choices before it, and a program that only ever looks at the line in front of it cannot pay that price in advance.

An unbreakable word such as incomprehensibilities or electroencephalographically can leave a gap of several spaces behind it, and a greedy breaker has no way to move a word down to share the gap.
