Inline objects

Icons drawn with the content builder flow with the words around them: ✓ done, ✗ failed, ☐ to do. A badge NEW carries its own text, lined up on the baseline of the line it sits in, and a picture sits at the middle of the text.

Vertical alignment of a 16 by 16 picture, each in its own line of text

baseline Hxg and a second word

top Hxg and a second word

middle Hxg and a second word

bottom Hxg and a second word

text top Hxg and a second word

text bottom Hxg and a second word

Justification spreads the extra width over the spaces and leaves objects alone, whether the lines are broken by first fit or by total fit. This paragraph holds a few of them, badge and ☐ and , in the middle of text that is long enough to need three or four full lines at this width, so the justified lines can show that the objects keep their size.
